

# Research Question:

What is the relationship between a building's size and its energy rating?

Can we expect energy efficiency to increase or decrease as square footage increases?

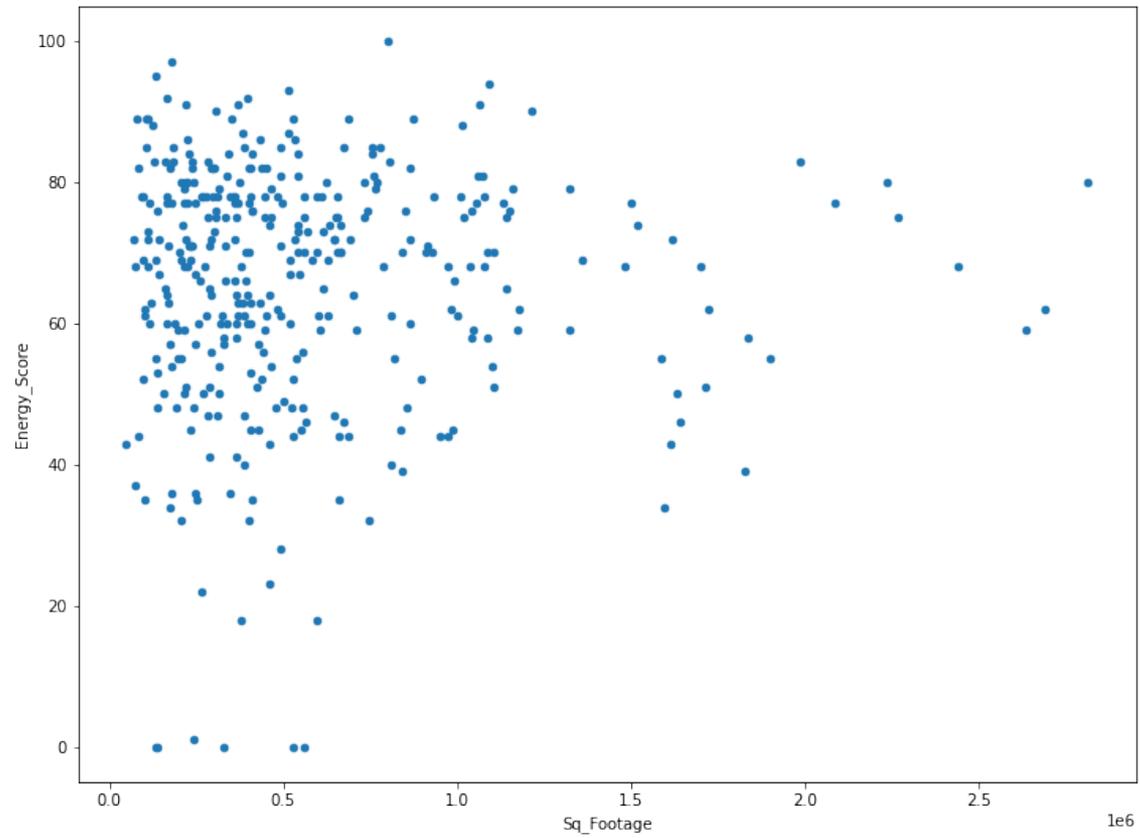

# Data Source: NYC Department of Buildings

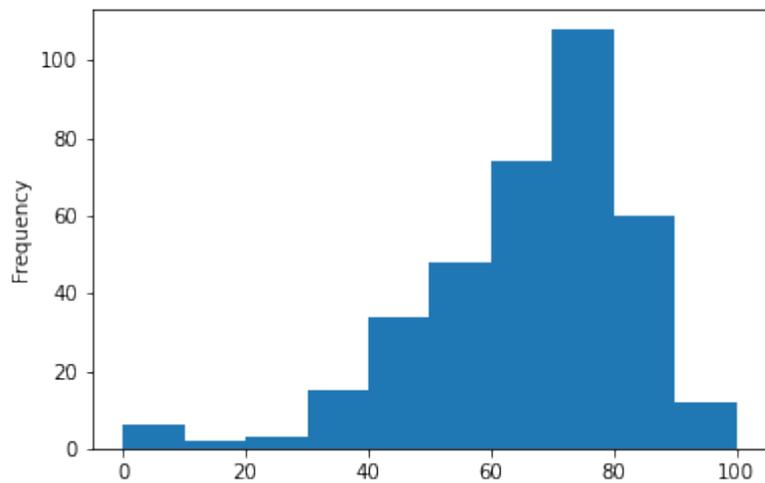

## Letter Grades:

- A: 85 or above
- B: 70 - 84
- C: 55 - 69
- D: 0 - 54
- F: buildings that don't submit required benchmarking information

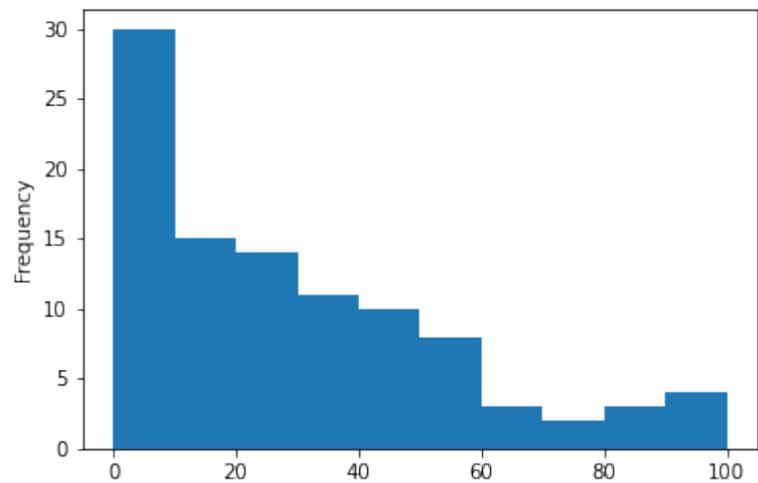

The City of New York

Office Buildings

Hotels

# Conclusion

- Square footage ??? energy rating
- Hotels scored worse than office buildings
- Elevator apartments performed better overall than walk ups
