

# LOST YOUR SHELL ACCESS??

## WELCOME TO **SDF**

スーパー・ディメンション・フォートレスへようこそ!

MANY UNIVERSITIES AND ISPS  
AROUND THE WORLD HAVE  
STOPPED PROVIDING GENERAL  
UNIX SHELL ACCESS TO THEIR  
STUDENTS. IF YOU PINE FOR  
ELM, TCOSH AND /DEV/NULL  
WE CAN HELP!

The SDF public access UNIX system was founded in 1987 and provides FREE and member supported shell accounts. For example, our FREE membership gives you immediate access to a shell, email, network utilities, www/gopher, chat and games. After you have validated your account, you will have access to your choice of a shell (sh, osh, ksh, bash, csh, tcsh, rc) and can host your own website with 80MB of personal storage.

We also offer a lifetime membership for a one time donation of \$36 which provides you with a generous disk quota of 600MB plus access to thousands of UNIX programs, including IRC, python, perl, ruby, USENET news readers and the C compiler.

For more information, telnet to 'sdf.lonestar.org' and login as 'new'. When you have created an account you can connect via SSH.
